

5TH'S HAPPENINGS PAGE 1

May 6, 2022

Math

In math we are moving into our last unit, greatest common multiples, GCM which is a fun topic. We just started so we are still learning. We recently ended with equivalent fractions. In math we have a great teacher, Ms. Kelly. Ms. Kelly is great at helping kids develop imperative skills. Did you know that Will created a 200 letter word search for math?

Language Arts

In Language Arts, we are reading the book Hatchet, by Gary Paulsen. After every few chapters, we will be answering questions on slides. Mr. Iwanowicz has been informing us on what we are filling out on all the slides. We are listening for a secret in the book. We can't wait to find what it is! Last month's journals were made by Natalie and the May Journals were made by Evelyn.

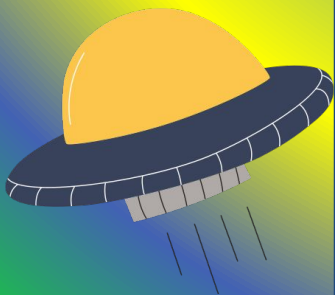

Social Studies

In Social Studies, we have been learning about the earliest humans in North America. We have been choosing our groups wisely so that Mrs. Hayes doesn't need to split us up. After we finish the packet, there is going to be an assessment that we have to take. We have to work on this independently. This week we are plowing through the second packet, and Mrs. Hayes also gave us a vocabulary quiz.

Science

In Science we have been working on the difference between day and night. We did one of the largest activities in science all year; a giant slideshow with so many activities. On one of the slides there were extra credit assignments. One of them was a kahoot we played. There was an oceans tides gizmo we did with a worksheet and a little quiz. The final activities we did were notes, kahoot, and we had a test on Thursday on tides. We are now learning about the relationship between the Earth and the Sun.

Specials

There are many specials in SMS for fifth graders.

- Chorus-We are getting ready for our spring concert June 8th. We have many songs to sing that we are practicing.
- FACS-We are sewing felt monsters. The deadline for having them done is the end of the week.
- IAT-Right now we are working on a coding project. Everyone in IAT is currently making their own project on Scratch which is a programming site.
- PE-Right now we are playing Nitroball with Mr. Morneault In the gym. We will be going outside for sports soon.
- Art-We are working on a bug project. We are tie-dying paper with colored tissue paper and then drawing bugs on the colored paper. Other classes are working on dragon eyes as well.
- Band-We are working on our concert songs. We have also been working on dynamics which is the volume of the music.
- Guidance-We are looking at colleges and jobs and finding opportunities according to our personalities. We have also learned about bullying in the past weeks.

The Fun Section

Did you know that Alfred Hitchcock, a horror film director, was scared of eggs? His quote was, "I'm frightened of eggs, more than frightened.

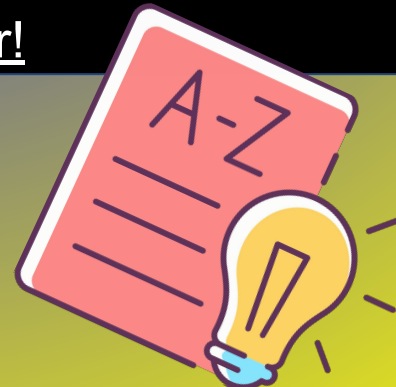

Why did the dinosaur cross the road? (go to bottom of page for answer)

Puzzler!

Reminders

- Hope you had a great Mother's Day!
- 26 more days of school
- Suggestion Box is right below
